## 🏠 PROJECTS

### Feane Restaurant Website

- <https://lakshmiharikaakula-a11y.github.io/Feane-bootstrap-project/> 🔗
- Built a responsive restaurant website using HTML,CSS and Bootstrap
- Used Bootstrap grid system and components for layout design
- Implemented mobile first design principles.
- customized Bootstrap classes to enhance UI and responsiveness.

### Kedia Organic

<https://js-project-six-topaz.vercel.app/> 🔗

- Developed a responsive e-commerce frontend project inspired by an organic products platform using HTML, CSS, and JavaScript, featuring a multi-layer navigation bar, dynamic product pages, and smooth UI interactions.
- Implemented category-based product filtering using query parameters and dynamically rendered product data from JSON, improving scalability and user navigation experience.
- Built interactive features including dropdown menus, add-to-cart overlay, auto-scrolling offers section, and responsive layouts optimized for different screen sizes.
